

GREEK MYTHOLOGY

Dr. Alexia Zotou and Dr. Orestis Karatzoglou

June 28-July 18, 2021

COURSE DESCRIPTION

This course surveys the central stories, gods, and heroes of Greek myth. We will read and analyze the ancient literary sources, interpreting them in their cultural context. The first week is devoted to the twelve Olympian gods, while in the second and third weeks we turn to the Theban and the Trojan mythological cycles.

Besides providing an overview of Greek myth, this course is designed to take advantage of its Athenian setting. For example, since we tour the Athenian Acropolis and Agora, we will study the myths and legends that took place in those locations or were depicted on temples there. Soon after we visit the ancient theater, we will study myths related to Dionysus. We will read some of the most interesting literary works of the ancient world, while becoming immersed in their material and social context.
